2013 WINTER DEMERSAL SHELF ROCKFISH FISHERY ANNOUNCEMENT

Sitka...The Alaska Department of Fish and Game (department) announced today the following information regarding the 2013 Southeast Outside (SEO) Subdistrict directed Demersal Shelf Rockfish (DSR) commercial fishery. The seven species in the DSR assemblage are yelloweye, quillback, canary, copper, china, tiger, and rosethorn rockfish.

The directed fishery will open in the East Yakutat (EYKT), Central Southeast Outside (CSEO), and Southern Southeast Outside (SSEO) Sections at 9:00 a.m. Wednesday, January 30, 2013. These areas will remain open until harvest allocations are taken or 4:00 p.m. March 22, 2013, whichever occurs first. Fishermen are reminded that waters of Sitka Sound and the Edgecumbe Pinnacles Marine Reserve are closed to directed fishing for DSR [5AAC 28.150 (c) and (d)(1)]. The directed fishery will remain closed in the Northern Southeast Outside (NSEO) Section (see attached map). For information regarding the 2013 directed DSR fishery in the Northern Southeast Inside (NSEI) and Southern Southeast Inside (SSEI) Subdistricts, refer to the department news release issued on December 21, 2012.

The 2013 Acceptable Biological Catch (ABC) for DSR in the SEO Subdistrict is 668,115 round lb (303 mt). After deduction of the 2013 DSR subsistence harvest estimate (15,435 round lb or 7 mt), 5AAC 28.160 (c)(1)(A) allocates the DSR total allowable catch as follows: 84% (548,251 round lb or 248.6 mt) to commercial fisheries and 16% (104,429 round lb or 47.4 mt) to recreational fisheries. This commercial quota is then apportioned by management area based on the contribution of that area to the overall biomass. The quota remaining for the directed commercial fishery for DSR is set after deductions for DSR bycatch mortality in other fisheries and test fisheries are made. Areas are opened to directed fishing if it is determined that there is enough available resource to conduct an orderly fishery and if there are no area-specific conservation concerns. NSEO does not have enough directed commercial quota available to conduct an orderly directed fishery in 2013.

Harvest Quotas for the Directed DSR Fishery

Area	Round lb	Metric ton (mt)
EYKT	88,200	40.0
CSEO	86,877	39.4
SSEO	131,418	59.6

General Provisions

Fishermen are required to register their vessel with the department prior to participating in the winter directed DSR fishery. Vessels that previously registered to fish in NSEI or SSEI in 2013 must re-register if they plan to fish in the EYKT, CSEO, or SSEO fisheries. Logbooks are required and a copy of the logbook pages detailing the landing must be attached to the fish ticket at the time of that landing. Fishermen are required to report location of catch by set in latitude and longitude (degrees and decimal minutes) for start and ending positions, amount of gear (skates and hooks), depth of each set, and amount of catch per set by species. Logbooks are available at department area offices.

In the Southeast District, DSR may be taken in the directed fishery by longline, hand troll, dinglebar troll, and mechanical jig gear. A Commercial Fisheries Entry Commission (CFEC) "Y" interim use permit is required for the DSR directed fishery. In the CSEO and SSEO Sections, a vessel or CFEC permit holder may not sell more than 6,000 pounds (bled weight) of DSR in any five-day period. Permit holders or vessels fishing in EYKT may not sell more than 12,000 pounds of DSR in any five-day period. Full retention of all DSR is required. All DSR taken in excess of trip limits by a vessel or CFEC permit holder in any five-day period must be weighed and reported as overage on a department fish ticket. DSR trip limit overage is forfeited and all proceeds from the sale of excess DSR shall be surrendered to the state.

Vessels fishing for groundfish in federal waters must have a Federal Fisheries Permit. For information on federal permits contact NOAA Fisheries at 800-304-4846 or 907-586-7202. Fishermen are reminded that there are four federal Coral Habitat Protection areas on the Fairweather Grounds in EYKT and one near Cape Ommaney in the CSEO Section that are closed to all fishing with bottom contact gear. Information on federal Habitat Areas of Particular Concern (HAPC), including coral protection areas, may be found at: <http://www.fakr.noaa.gov/frules/71fr36694.pdf> (refer to Table 26 to Part 679). For questions regarding federal regulations or bycatch allowances, contact NOAA enforcement at 907-586-7225.

Bycatch Provisions

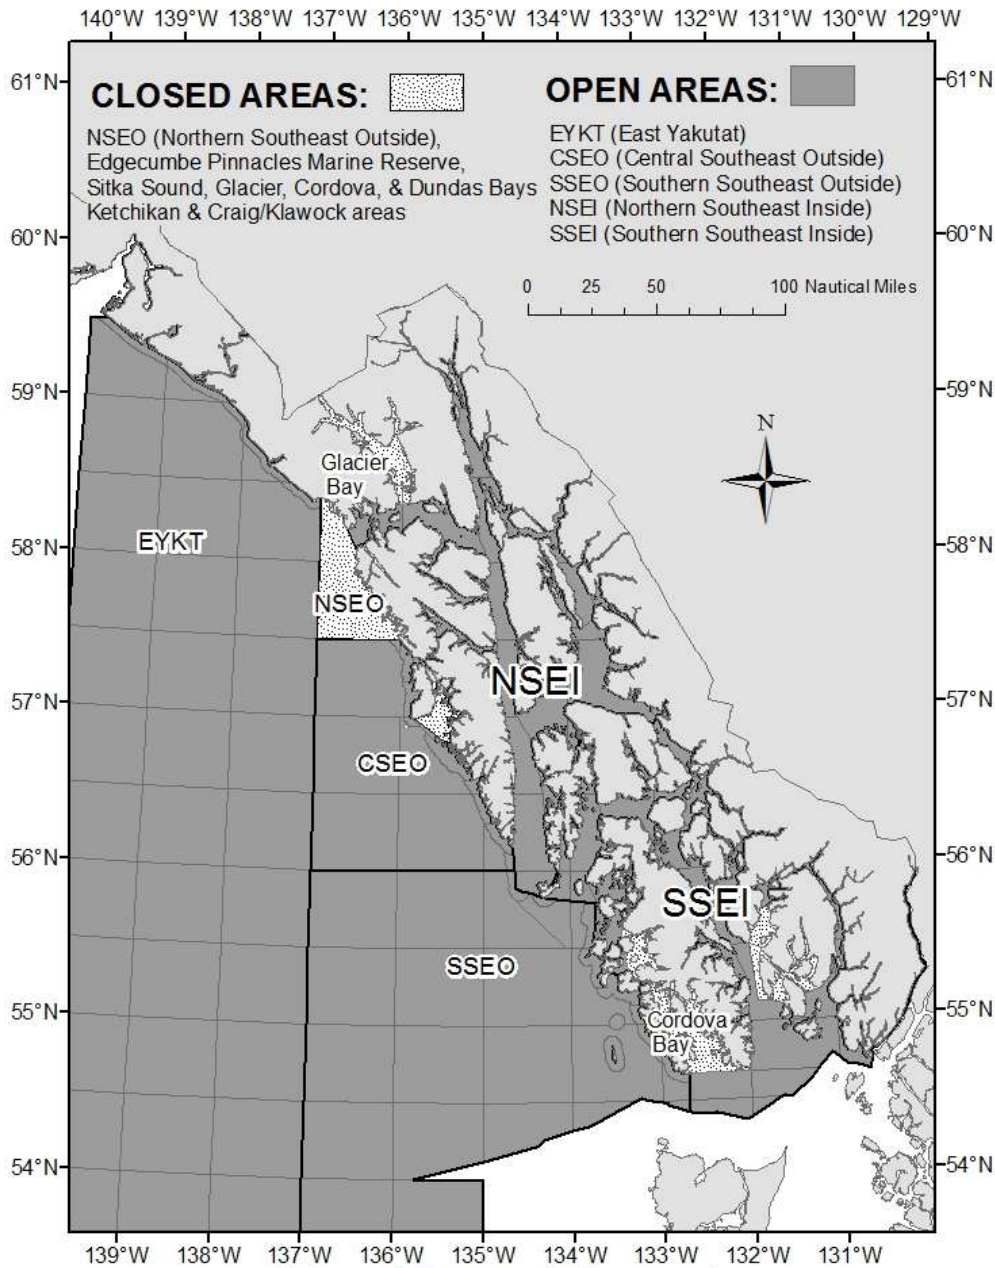

State waters (0-3 miles) bycatch provisions for DSR longline and jig permits are listed in the following table. All bycatch is calculated round weight, based on the round weight of the DSR sold. Bycatch allowances in state waters match federal waters allowances unless otherwise noted.

BYCATCH SPECIES	EYKT, CSEO, SSEO
Lingcod*	Longline fishery- 35%. Jig fishery- 0%.
Shortraker and Rougheye Rockfish	7% in aggregate.
Black, Blue, and Dark Rockfish	15% in aggregate. Full retention required for black rockfish.
Other Rockfish and Thornyhead	15% in aggregate.
Dusky, Widow, and Yellowtail Rockfish	Open to directed fishing in Federal waters only (with LLP license and CFEC Misc Finfish permit).
Pacific cod	20%, Open to directed fishing with Misc Finfish permit (and LLP license in Federal waters).
Dogfish	State waters Longline fishery- 35%. State waters Jig fishery- 20%. **Federal waters- 20% in aggregate with "Other Species".
Other Groundfish	State waters- 20%. **Federal waters- see Table 10 for Retainable Percentages.

*minimum size limit- 27" from tip of snout to tip of tail or 20.5" from front of dorsal fin to tip of tail.

**view Federal Retainable Percentages (Table 10) at: <http://www.fakr.noaa.gov/rr/tables/tab110.pdf>

Catch and effort will be closely monitored and area closures may occur on short notice. Closures will be announced by news release and on the United States Coast Guard "Notice to Mariners" report and the National Weather Service broadcast. Closure updates will also be available on the Groundfish Hotline at 907-747-4882.

This map is for general reference only.
EYKT, CSEO, and SSEO open to directed fishing for DSR at 9:00 a.m. on Jan. 30, 2013.
